Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The 4/21/08 amendments have added "organic solvent based functional fluid" in the preamble of independent claim 1 and new claim 21. It is not clear if any new limitations are being claimed because there are no steps in the body of the claim to reflect the "organic solvent based." Clarification could be achieved by adding "organic solvent based" to the recitation of "functional fluid" in the body of the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Becket (USP 5,710,372).

Becket teaches in the abstract a method for measuring constituents in a lubricating fluid by a colorimetric reaction with a reagent and subsequent comparison to a color calibration scale. Column 8 lines 29-30 teach the matrix or test medium can be a "polypropylene fiber mat" which has been read on the claimed "test medium

comprises polymeric fibers." Column 14 lines 11-14 teach the fluid tested fluids are lubricants including "ester, amides, polyethers, amines and sulfonated oils which have been read on the claimed "functional fluids" and "organic solvent based functional fluid".

Response to Arguments

Applicant's arguments filed 4/21/08 have been fully considered but they are not persuasive.

Applicant state Becket fails to test the claimed "organic solvent based functional fluid." In light of the 35 USC 112 second paragraph issues above, it is not clear if Applicant's claims are limited to an "organic solvent based functional fluid." Even if the claims were amended to properly claim these limitations, Becket clearly teach in column 14 lines 11-14 teach the fluid tested fluids are lubricants including "ester, amides, polyethers, amines and sulfonated oils which have been read on the "organic solvent based functional fluid". Claim 13 specifies the solvent is an "ester" which is identical to Becket. Claim 15 specifies the "functional fluid" is a lubricating oil which is also identical to Becket.

The Office has vacated the rejections over Morris and Pickup et al. in light of Applicant's remarks and the belief that Becket is the best reference.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
